Full-Stack Engineer (Solutions-focused) | Integrations, onboarding, and reliability | TypeScript/React, Node, AWS

Customer- and product-minded engineer who ships end-to-end features and integrations, then makes them reliable in production. Strong at translating ambiguous requirements into working software, writing clear docs, supporting deployments, and running technical discovery and product demos.

Technical Skills:

- **Languages:** JavaScript (ES6+), TypeScript, Python
 - **Frontend:** React, Tailwind, MUI
 - **Backend:** Node.js, Express, REST APIs
 - **Databases:** MongoDB, PostgreSQL, MySQL
 - **Cloud & DevOps:** AWS (EC2, Lambda, S3), Docker, GitHub Actions
 - **Testing & Auth:** Jest, SuperTest, OAuth (GitHub)
 - **AI :** OpenAI API, vector databases (Qdrant, Pinecone)
-

Experience:

Full-Stack Engineer — OSLabs (Open-Source Product Residency)

2025

DevStack AI — AI-powered developer onboarding tool for searching codebases and documentation using natural language.

- Shipped DevStack AI, a developer onboarding tool that lets teams search codebases and docs with natural-language queries.
- Owned backend services and API design in Node.js/Express, shaping stable interfaces for the React app and ingestion workflows.
- Built embeddings and vector retrieval (Qdrant) with LLM-based answering, returning traceable, file-linked results that are easy to validate.
- Assisted with frontend integration in React, improving usability with clear loading/error states and helping reduce onboarding ramp-up time by ~30% (est.).
- Integrated GitHub OAuth and automated repo ingestion and re-indexing so access stayed secure and results stayed current.
- Collaborated closely with a small team on scoping, documentation, code reviews, and delivery of a production-ready MVP.

Tech: React, Node.js/Express, Python, MongoDB, Qdrant, OpenAI API, AWS

Software Engineer (Contract) — Nooxit

2024-2025

- Delivered internal tools used by non-engineering stakeholders to manage operational workflows and configuration.
 - Built and supported Node.js/Express APIs integrating third-party services and cloud-hosted databases.
 - Implemented secure authentication and role-based access control for multi-user workflows.
 - Delivered AI-enabled document Q&A features (PDF ingestion, embeddings, natural-language answers) surfaced in a React UI.
 - Owned deployment basics on AWS (EC2, S3, managed databases), including troubleshooting and reliability improvements.
 - Automated tests and deployments with GitHub Actions to speed releases and reduce regressions.
-

Education

Codesmith – Advanced Residency for Software Engineering | Remote

2025

Level Up in Tech – Cloud & DevOps Training | Remote

2022 - 2023

Project-based, cohort-driven curriculum covering AWS services, serverless architectures, containerization (Docker, Kubernetes), Infrastructure as Code (Terraform), and CI/CD pipelines

Associate of Arts

Kingsborough Community College, Brooklyn, NY

Certifications

- AWS Developer Associate (2023)
- LPI Linux Essentials (2022)
